PERSONAL TRAITS: (i). Optimistic, (ii). Adaptable, (iii). Punctual, (iv). Time Managing, (v). Quick Learner, (vi). Tenacious

EXPERIENCE

FROM 19TH SEPTEMBER, 2022

FRONT-END WEB DEVELOPER INTERN, PHYSI-FIT ([CERTIFICATE](#))

- Worked in a team of 6 people and created a front-end compatible for android and web applications related to Physiotherapy.
- Experienced solving JIRA tickets and implementing new features on our product which aims to secure data in motion.
- Renamed every file, folder and components of the project according to the rest nomenclature.
- Refactored the whole Home Page, About Us Page and Frequently Asked Questions Page of the website and also made it responsive in nature.
- Designed and developed the Dashboard section of the website, for the Doctors to contact patients, view and update patient details, generate prescriptions, send appointment and payment details to the patients more conveniently.
- Created a Blog with the title, "Groin Pain in Football Players" in MDX, using meta tags and keywords, so that search engines will show it to the users for searches with relevant keywords.
- Worked on implementing Redux in the dashboard with the help of React-Redux.

PROJECTS

STACK OVERFLOW CLONE WEBSITE

- Developed using MERN (MongoDB, Express JS, React JS, Node JS) Stack.
- Technologies like Redux, React-Redux, Redux-Thunk (for state management), B-Crypt JS (for hashing passwords), Node-Mon, JSON web token and Dot ENV are used.
- It is a web application where a user can ask any question, which will be answered relevantly by other users.
- Also, users can upvote or downvote any question or answer as per their wish.
